

DECOREX attends to high impact events with the clear purpose of being present in the international trades

High quality results.

Our Activity

DECOREX CB was set up in 1982 with the aim of producing internal blinds. Thanks to the effort of its whole team, DECOREX CB had a great evolution, that led in 1991 to the establishment of DECOREX PROTECCION SOLAR S.L.

From this moment, we start thinking on the self-production of components and the start-up of a big fabric stock, at the service of blind manufacturers.

Nowadays, and with a big effort due to the change of direction of the company, DECOREX is consolidated as a component factory and its exports can be found all over international

The customers are served in the reception of DECOREX, where they agree commitments of purchase or distribution of the products.

In the reception, installed as a stand, the customers have at hand the components, tissue catalogue and finished products.

We are pleased to invite our visitors to know our activity and production, and to verify from first hand the quality of our products.

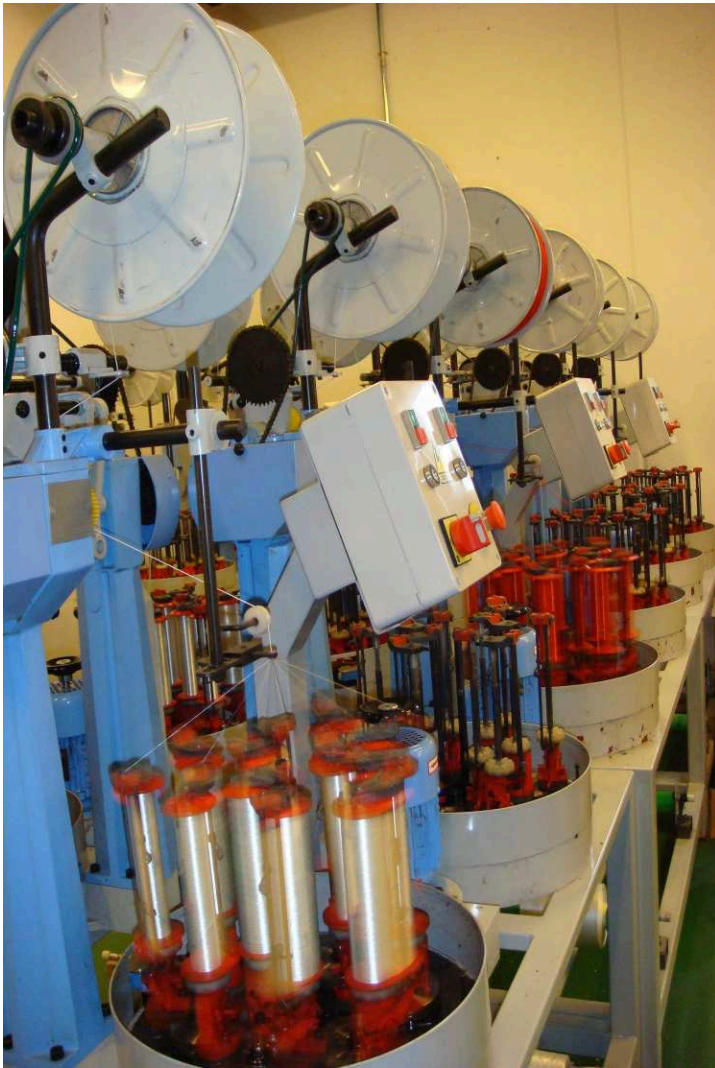

The plastic components are produced starting from high quality pellets, and they are controlled electronically.

The tests realized assure us the oversize in strength and durability of the components.

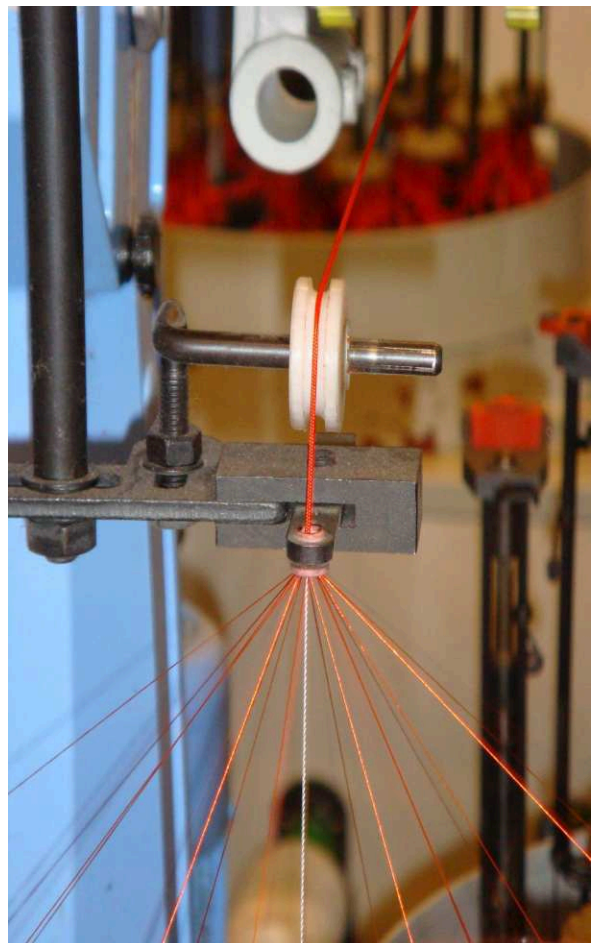

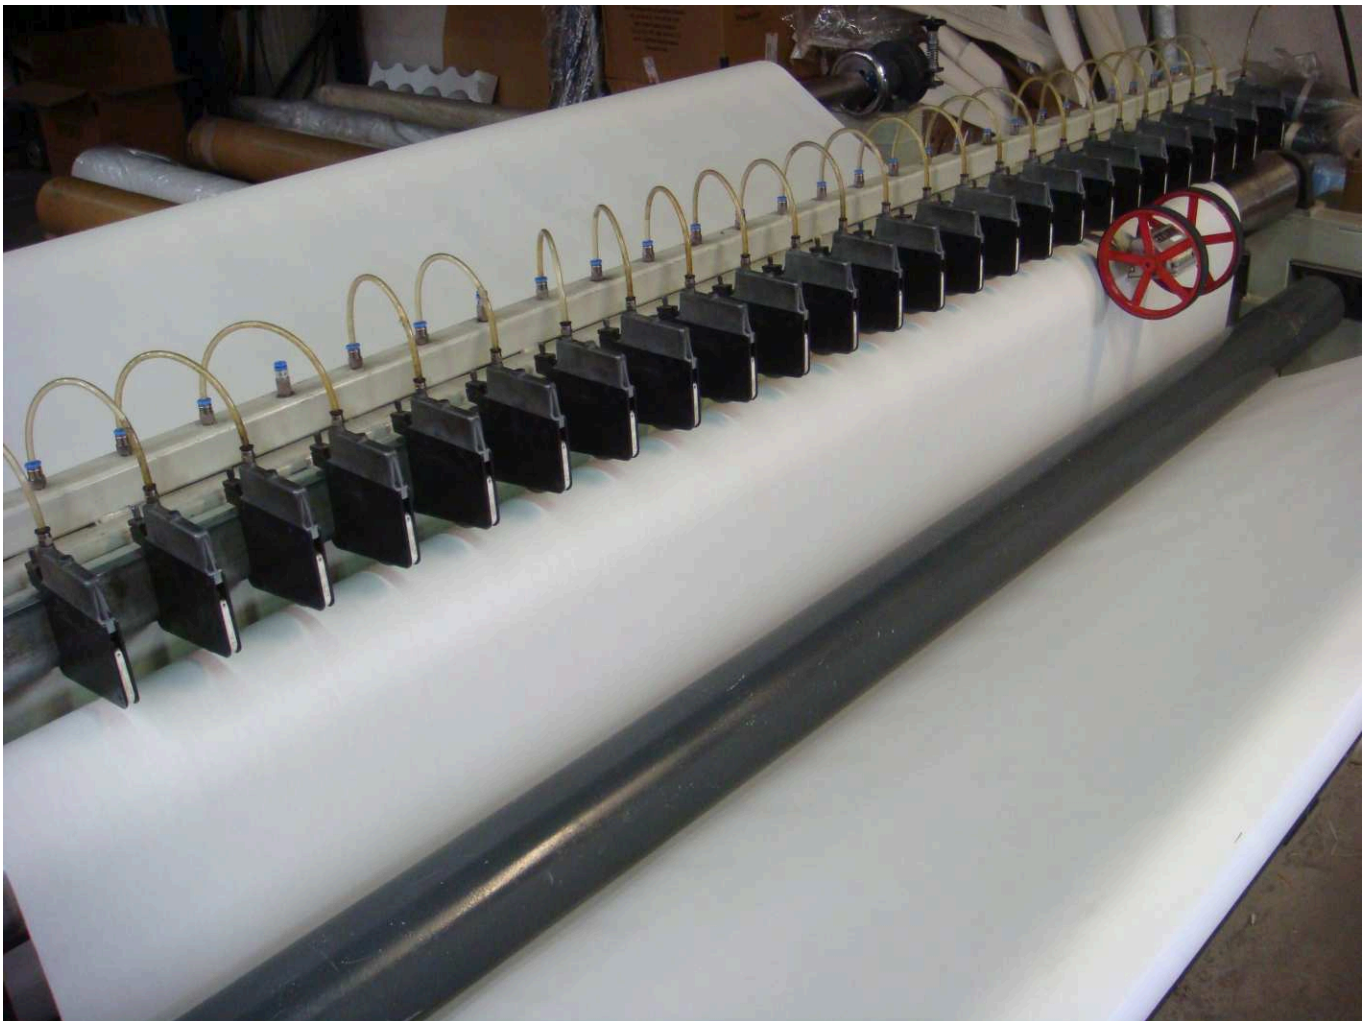

Our Activity

High tenacity fiber are used for the cords.

The thread is coloured, and the colour is fixed previously, which guarantees us its permanence, avoiding the lose of colour of the final product.

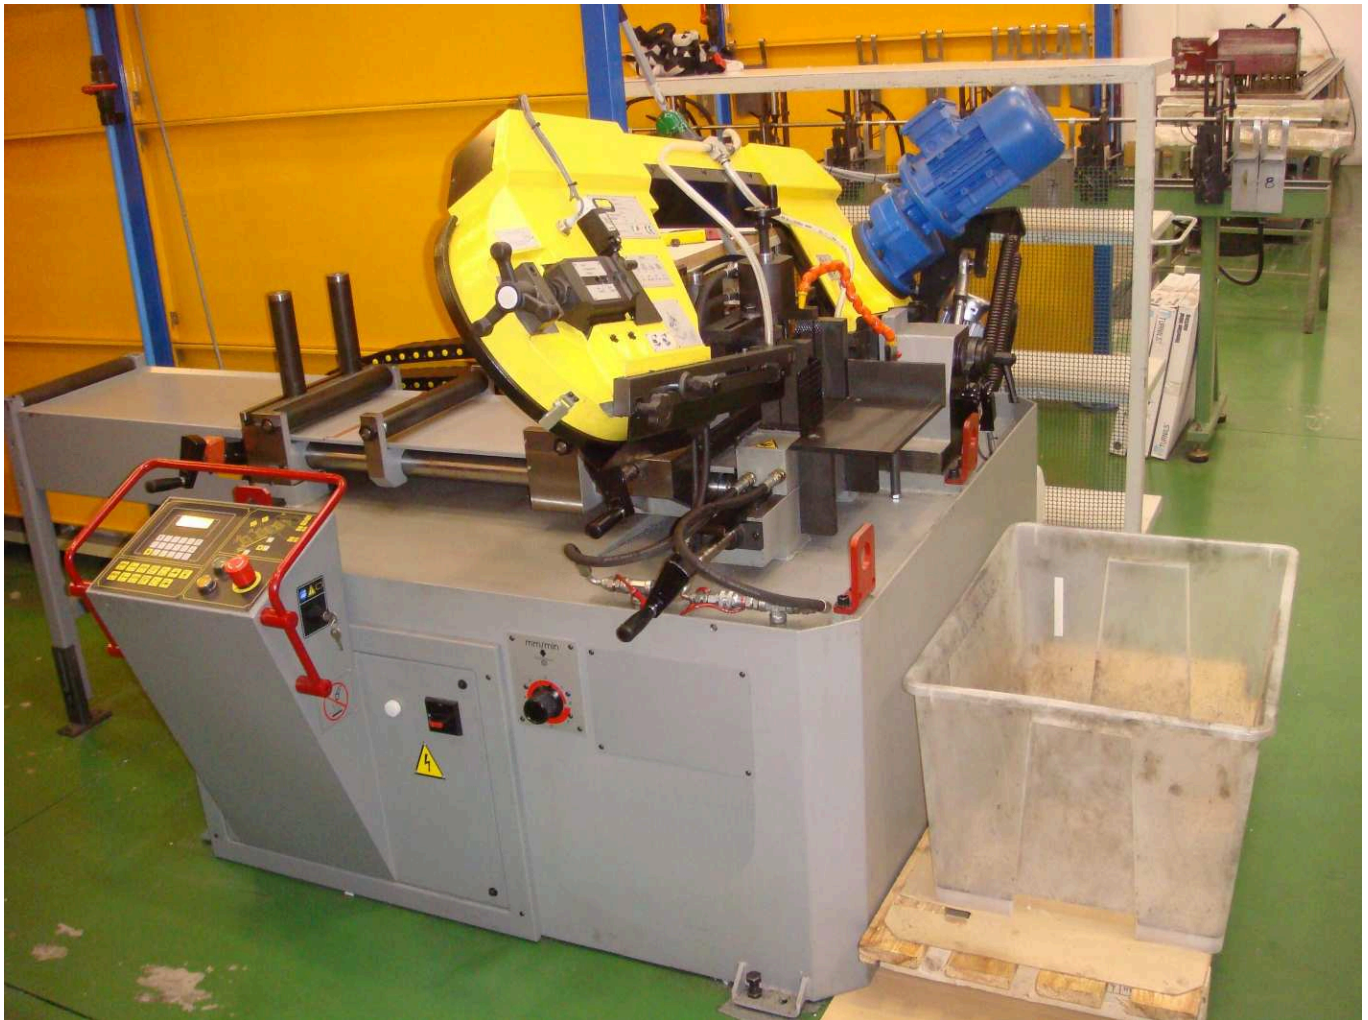

The fabrics, are treated and adapted for Roller blinds, Verticals and Japanese Panel.
We have in stock roll of large length, this guarantee the service of any product that we need to make, avoiding delays or out of stock.

Our Activity

Seeing the importance of the weights in the decorative articles, and having these the need for metallic insertions, DECOREX bets and invests in machinery of automatic cut for metals.

With the investment in vibrators to treat and polish metals, we close a chapter that allows us to extend the range of products, getting a great versatility of work, at the same time that allows us to manufacture different components of diverse forms, weights and applications.

Our Activity

The stocks of fabrics and components are permanent which guarantees a punctual and daily service
